The following is an examiner's statement of reasons for allowance:

Bichile discloses superconductive Zn-doped  $\text{YBa}_2\text{Cu}_3\text{O}_7$  powders of the formula  $\text{YBa}_2(\text{Cu}_{1-x}\text{Zn}_x)_3\text{O}_{7-y}$  wherein  $x$  is 0.01 to 0.03 (page 58, Table 1). The powders have a particle size of 2 microns.

As stated by applicant in the response filed 3/17/04, the reference does not disclose or suggest the instantly required "obtained by melt texturing" limitation. Melt-texturing and sintering (disclosed in Bichile) are known in the art to produce/result in different microstructures. The products would not appear to be the same or substantially the same.

Newly cited Zhou et al discloses Zn-containing superconductors produced by melt processing (Abstract; experimental). The reference is not available as prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark Kopec whose telephone number is (571) 272-1319. The examiner
